

2011 International Future Energy Challenge

A message from the
sponsor

IEEE Industrial Electronics Society,

Undergraduate Education

Improvement and support of the undergraduate education in EE is one of the prime goals of IEEE-IES.

Technical committees on power electronics and electric machines/drives within IES have assigned judges from industry/academia to participate in the final testing of the prototypes.

There will be two separate awards for innovation in power electronic design and control of electric drives.

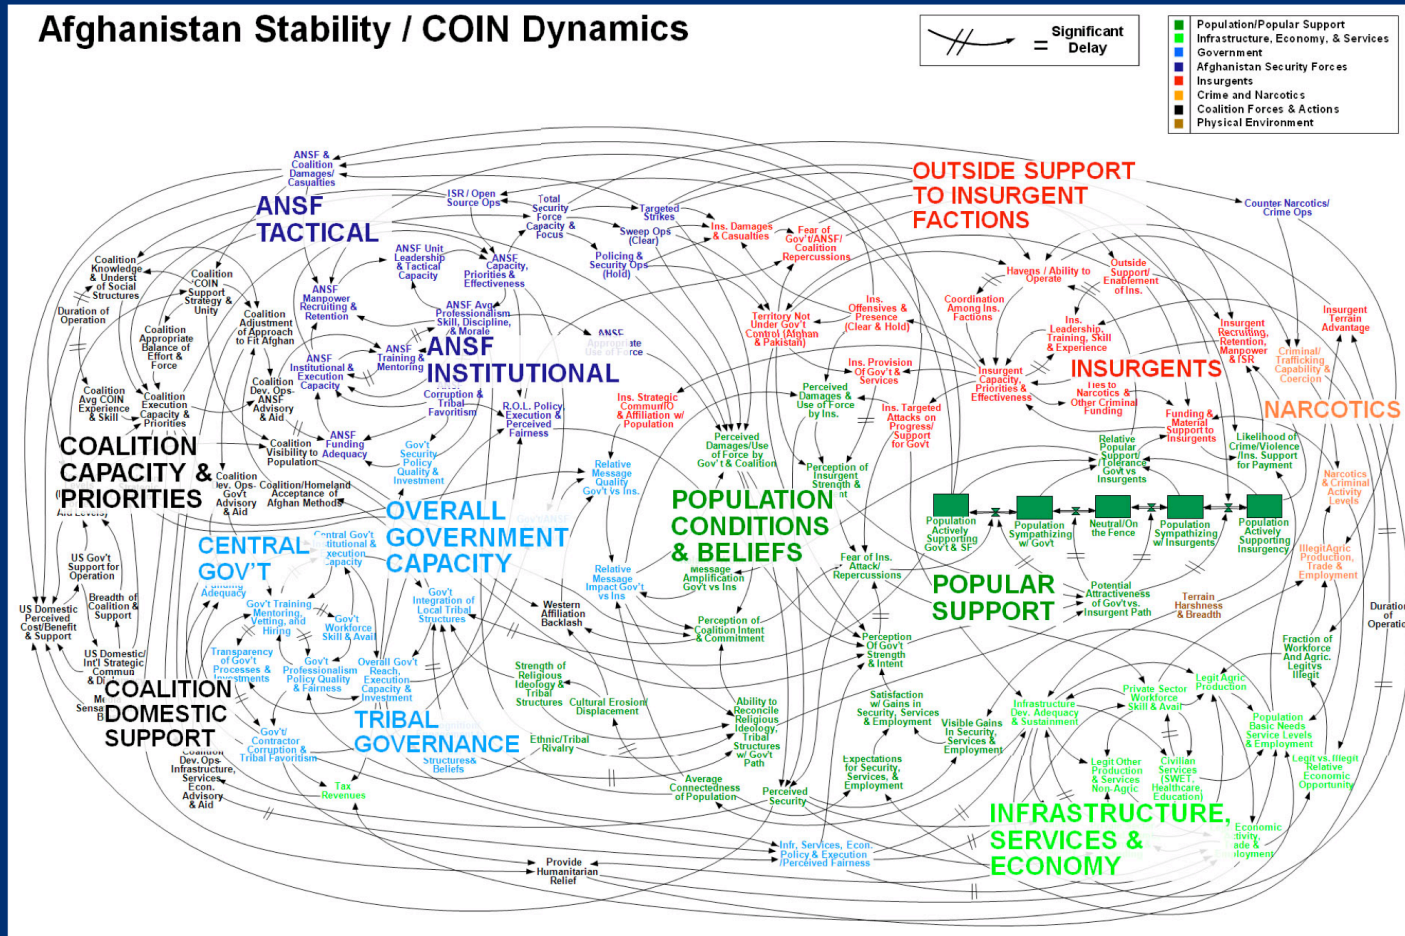

The recipients of these awards will be invited to attend the IECON 2011 (Australia) and receive their awards at the banquet. (Travel expenses for the team representative will be covered.)

The award includes a \$5000.00 cash award along with a certificate.

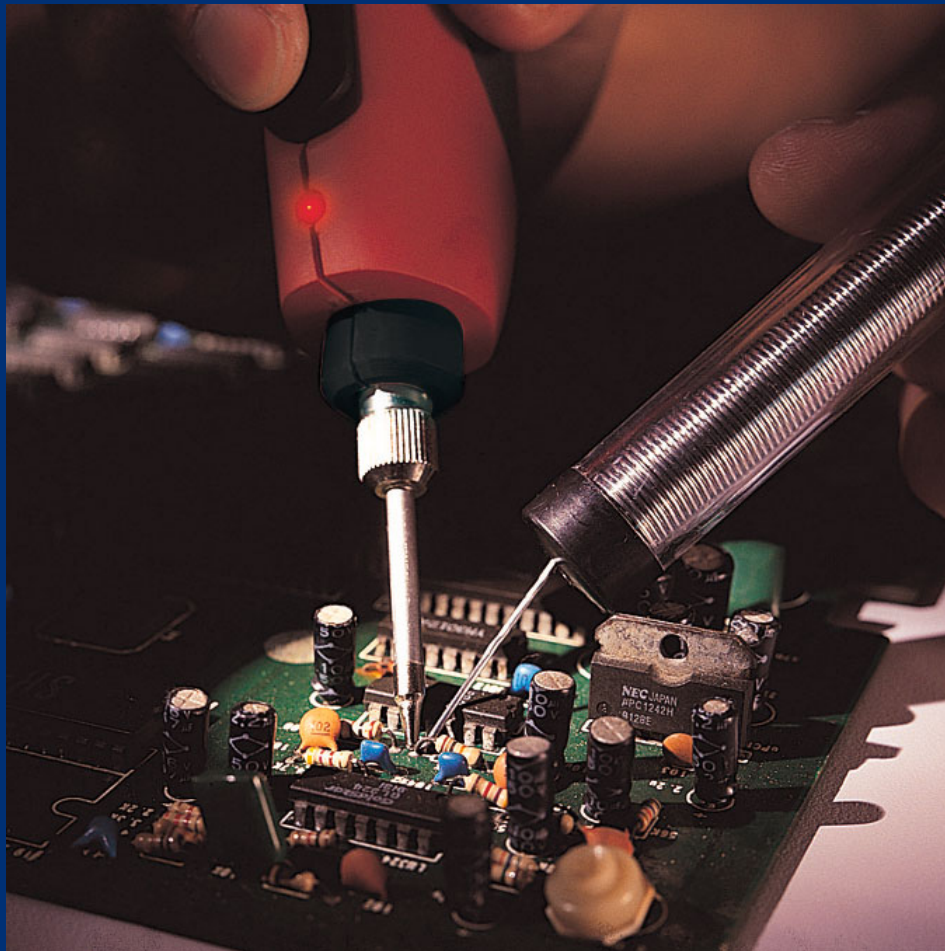

- **IEEE –IES would like to play a more active role in the future IFEC Competitions.**

Effective Planning!

Afghanistan Stability / COIN Dynamics

Building, testing, teamwork!

TEAMWORK!
WORKING TOGETHER GETS THE GOODS!

Competition, Championship!
